

MANI FOLD WORLD

HYDRAULIC MANIFOLDS

"We rely on a consolidated experience and a new management leading the organization to growth and business development."

"We have been operating in hydraulics sector for almost 50 years."

"We continuously invest in new technologies looking towards the future."

"We are certified to ensure highest levels of quality in our products and services."

"We manufacture standard CETOP manifolds and special blocks for every customer need."

"Aluminum, Steel, Stainless Steel and Cast Iron: we only work with high quality and certified materials."

"In 2023 a global reorganization of the plant and the production area was realized to increase efficiency."

"2200 m² dedicated to production processes."

Since it was founded in 1976, CEI has been specialized in the manufacturing of blocks for hydraulic systems.

As of 2021, with the establishment of the new management team, the company has started an innovation process bringing improvement to production capacity, with investments on state-of-the-art technologies and machinery equipment. A complete redesign of workspaces, that have been optimized to ensure efficiency and working comfort for all the staff, has occurred too.

A consolidated expertise, high precision processes, innovation and continuous development enable CEI to establish a strong presence in the international market.

CEI HYDRAULIC MANIFOLDS

SPECIAL MANIFOLDS

With over 34.000 different working programs and a warehouse containing more than 1.800 tools for cavities, CEI is qualified and recognized in the market to produce customized hydraulics manifolds.

The production process is marked by accuracy, and, at the same time, flexibility to meet Customer requests. Different surface finishing, accurate assembly and packaging processes complete the offer of supplied products.

CETOP MANIFOLDS

Thanks to the expertise achieved over the years, CEI has decided to expand the range of its products by launching the production of CETOP blocks.
The current product range in the catalogue includes the following items:

- > Single bases CETOP 3 / CETOP 5
- > Modular bases CETOP 3 / CETOP 5
- > Linking modular blocks CETOP 3 / CETOP 5
- > Monoblocks CETOP 3 / CETOP 5

The strong attitude and the commitment to set a dedicated customer service allow CEI to engineer and achieve customized solutions for the standard valves too.

DESING PLANNING,
RESEARCH,
QUALITY

THE FOCUS ON MEETING CUSTOMER NEEDS, THE USE OF CERTIFIED RAW MATERIALS, AND TECHNOLOGICAL

INNOVATION ARE THE FOUNDATIONS UPON WHICH THE COMPANY HAS BUILT ITS IDENTITY AND CONTINUES TO EXPAND IN THE MARKET.

From an idea to the finished product

CEI assures high levels of quality, production processes and accuracy during all phases of the technical project from initial study phase to prototype and series production.

The mission of CEI is founded on two main values:

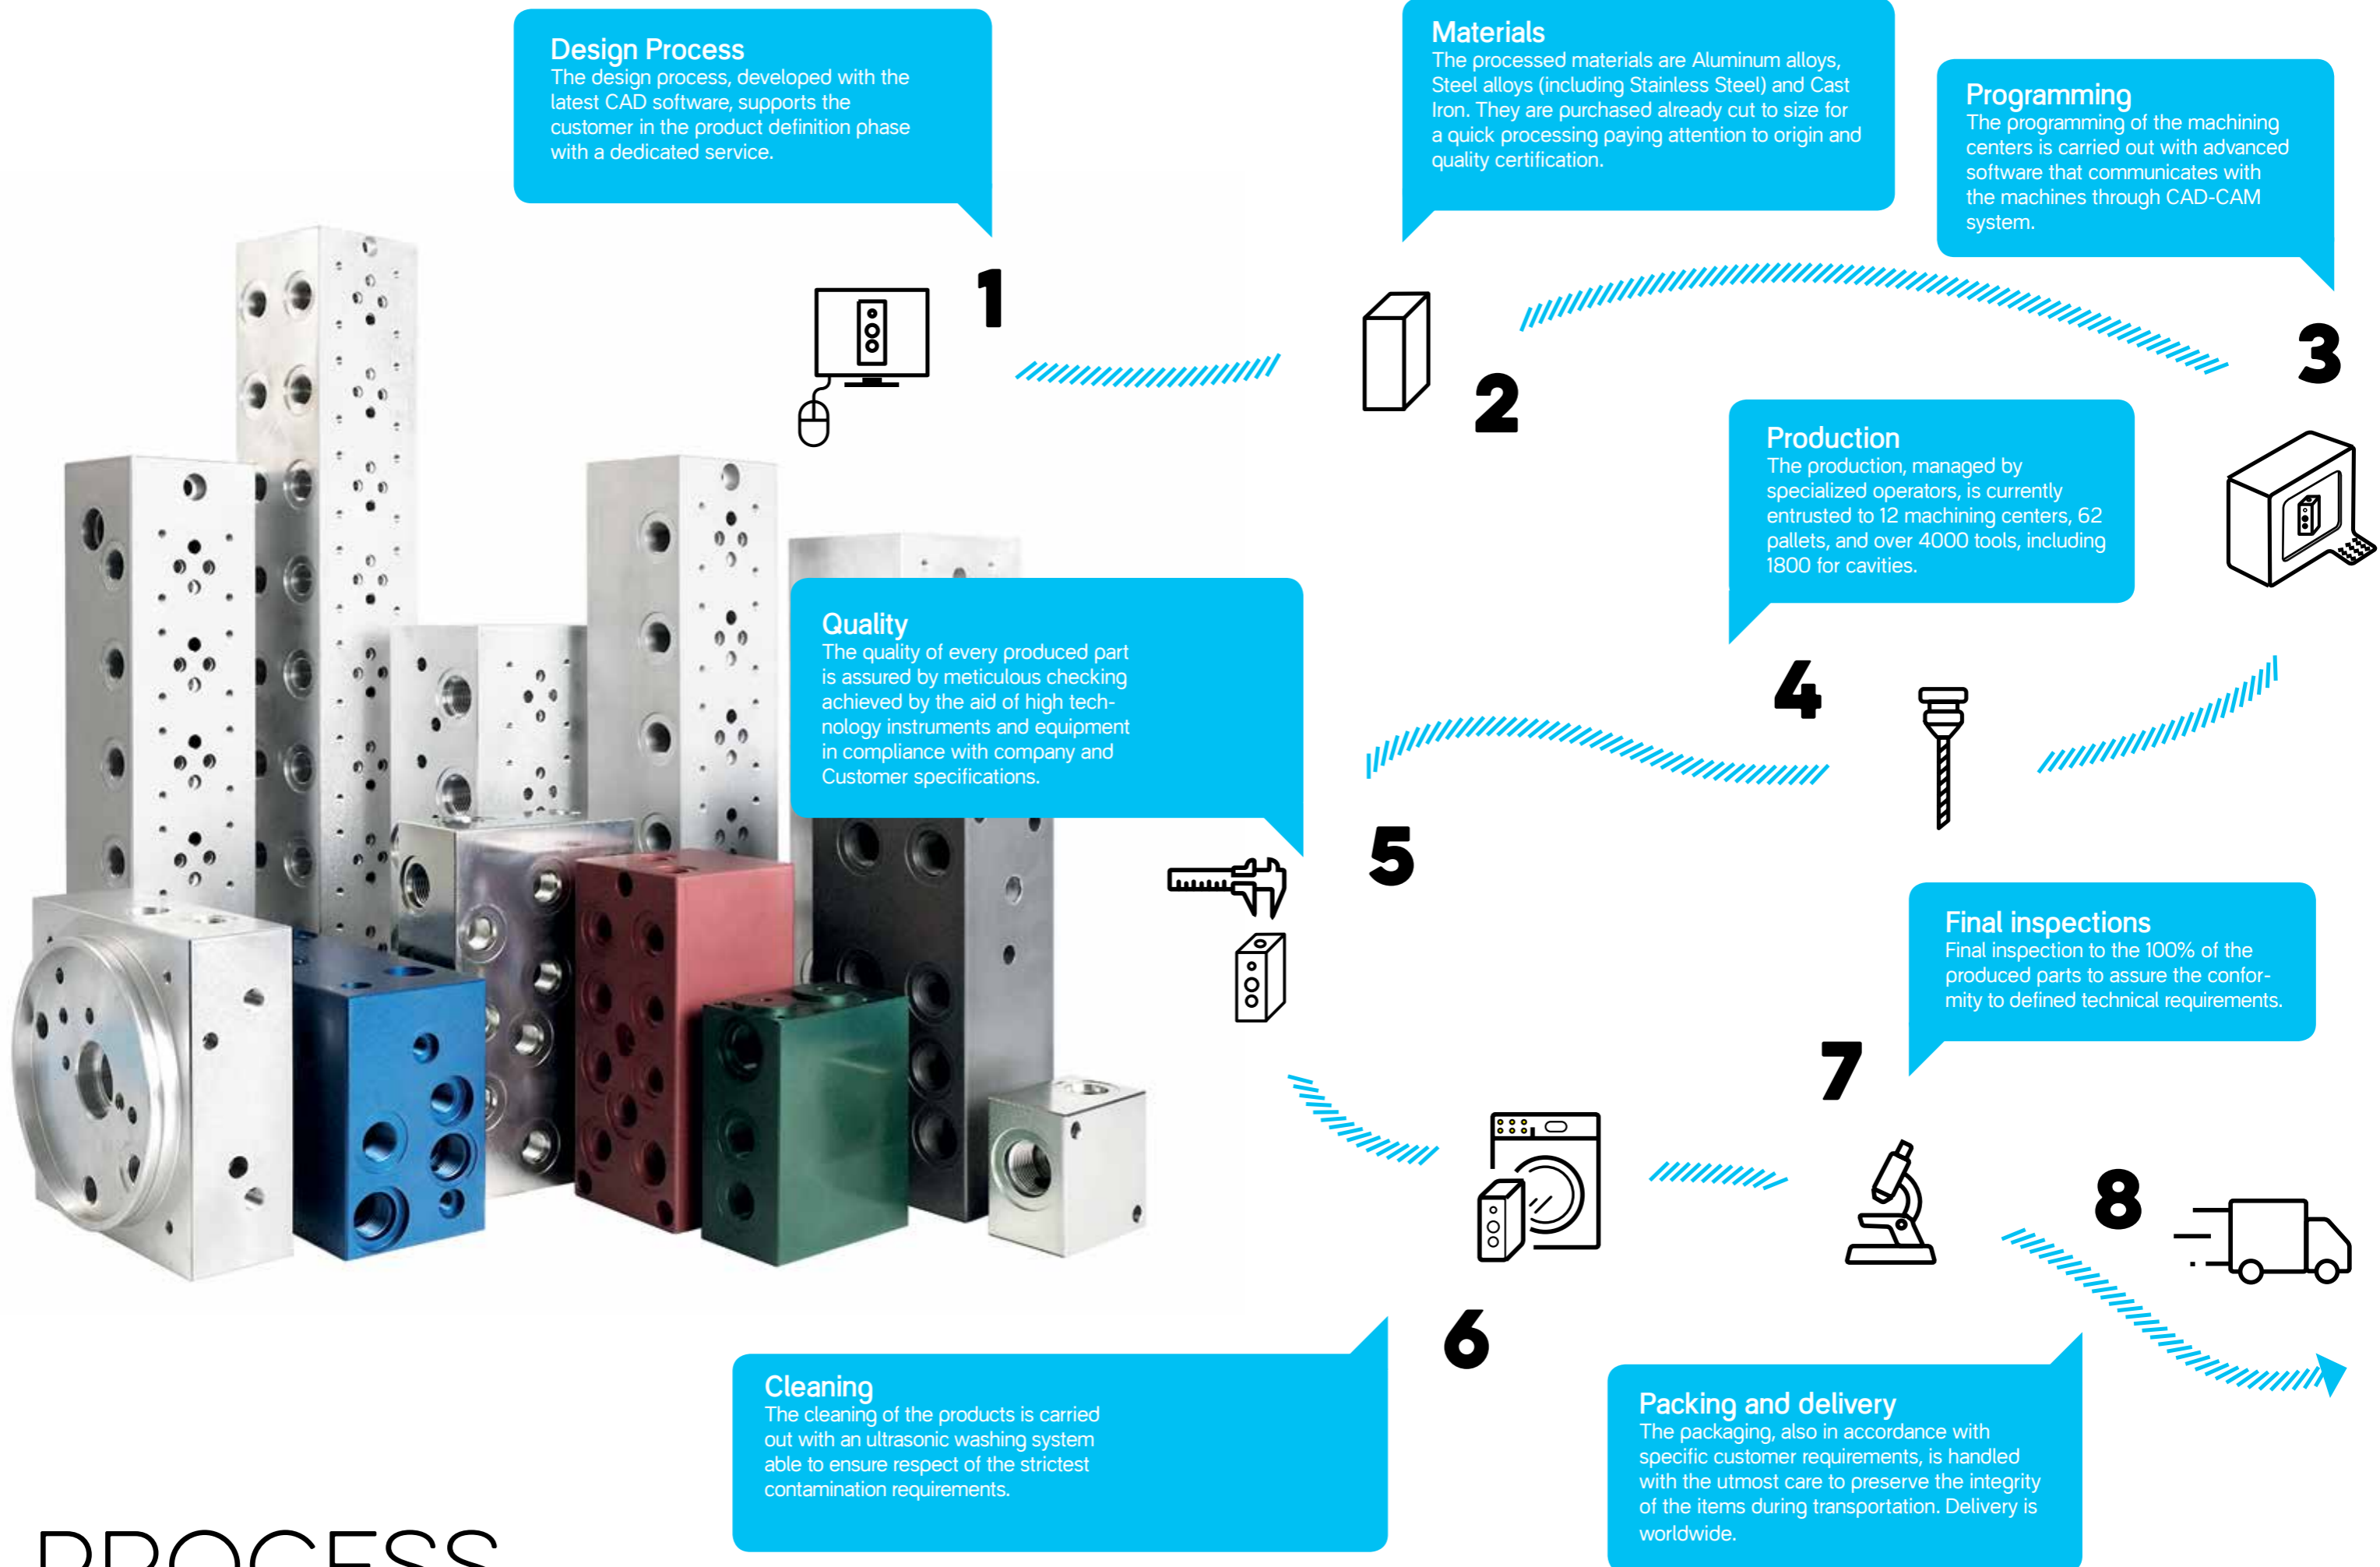

- The expertise gained over many years of activity
- Drive for technological innovation

Born from solid artisan roots in 1976, the company has continuously chased growth, improvement and innovation moving along the years towards Industry 4.0.

The company is organized to meet the ISO 9001:2015 quality standards.

PROCESS

PROCESSING AND MACHINES

Technology and expertise to produce with maximum efficiency and speed.

CEI IS ORGANIZED TO SUPPORT THE CUSTOMER FROM PROTOTYPING TO MASS PRODUCTION.

PLANNED GROWTH FOR 2024-2025:
+1000 m² OF PRODUCTION AREA
ADDITIONAL MACHINING CENTERS

CEI currently operates production with a staff of over 40 employees in an area of 2200 square meters.

We have a wide range of special tools, chosen with the utmost care for different types of processed materials. Tools development is carried out internally, and we collaborate with global industry leaders.

CEI currently has 12 machining centers with a total of 62 pallets. The various types of equipment are designed to ensure extensive versatility in processing blocks of various sizes.
